

Zinsser® Gel Stripper is designed to be used as an environmentally friendly paint and oil remover on all vertical and horizontal exterior surfaces. Its unique formulation is designed to efficiently coat the paint or oil and not run off, ensuring its active ingredients work directly on the paint itself and not drain off the surface.

READ ALL DIRECTIONS BEFORE BEGINNING PROJECT

RECOMMENDED FOR: Exterior timber surfaces.

NOT RECOMMENDED FOR: Interior floors or furniture.

APPLICATION TIPS: Wear gloves, protective eyewear and appropriate footwear when applying Zinsser Gel Stripper.

SURFACE PREPARATION: Prior to application of Zinsser Gel Stripper, ensure that all surrounding areas are properly protected with plastic drop sheets and that all plants and lawns are completely wet prior to removal of the Zinsser Gel Stripper.

APPLICATION: Apply Zinsser Gel Stripper liberally over paint or oil and allow to penetrate for up to 60 minutes. For oiled decks and timber structures agitate the Zinsser Gel Stripper with a stiff brush, broom or mechanical scrubber. When the coating shows signs of softness, wrinkling or discolouration, it can be cleaned off the substrate using a clean rag, hard bristle brush, metal scraper, scourer or pressure cleaner. Once the gel stripper has been removed wash the surface with Zinsser® Timber Prep Oxalic acid to neutralise the timber surface. For difficult coatings it may be necessary to agitate the Zinsser Gel Stripper with a stiff brush or broom or mechanical scrubber, and if necessary cover the Zinsser Gel Stripper with

a plastic sheet. Do NOT let Zinsser Gel Stripper dry out. If necessary apply more Zinsser Gel Stripper to the affected area to keep moist. NOTE: Care must be taken when using any paint strippers to ensure that the substrate or pre-existing coating is not damaged in any way. Not pre-testing surfaces or leaving paint strippers on for excessively long times may cause irreparable and costly damage to the surface being cleaned. Zinsser Gel Stripper has been carefully formulated to minimise any such damage; however it is entirely up to the user of the product to work within its recommended guidelines.

APPLICATION TIME: Dwell time of Zinsser Gel Stripper on coatings is dependent on the type of paint or oil to be removed and in most cases this may take 15-30 minutes. On aged paint or difficult to remove paint dwell time may exceed 60 minutes.

COVERAGE: 10-15m² per litre depending on the porosity and texture of the timber.

DISPOSAL: Wash all scourers, rags and residues with water and collect for disposal at approved landfill site. Keep unwanted products in sealed containers and dispose of at chemical waste collection depots. DO NOT PUT DOWN DRAINS. Dispose of empty containers in local recycling programs and bins – check with council first.

STORAGE: Store in a cool and well-ventilated place. Keep locked up.
